Announcing Model Context Protocol (MCP) support for Google services

December 11, 2025

Michael Bachman
VP/GM, Cloud Foundations

Anna Berenberg
Engineering Fellow, Google Cloud

With the recent launch of Gemini 3, we have the state-of-the-art reasoning to help you learn, build, and plan anything. But for AI to truly be an "agent", to pursue goals and solve real-world problems on behalf of users, it needs more than just intelligence: it

Introducing Meta Ads AI Connectors: Manage Your Meta Ads From the AI Tools You Already Use

Takeaways

- Meta ads AI connectors let advertisers and agencies create, manage, and analyze campaigns in the AI tools they already use — no developer credentials, API setup, or coding required.

Adobe for Business Sign In

Building custom agentic experiences with a commerce model context protocol (MCP).

While agentic protocols unlock transactions across third-party surfaces, the brands that truly differentiate will go further, building their own intelligent, agent-driven experiences.

At Summit, Adobe Commerce introduced a Commerce MCP server that gives developers secure, real-time access to core commerce data and capabilities, including catalog, cart, pricing, inventory, promotions, checkout, order management, and post-purchase flows. This enables merchants to create their own agentic commerce experiences or integrate with third-party solutions to create shopping assistants, voice shopping agents, upsell agents, and more.
